

The Air Show

THE AIR SHOW is an exciting exhibition of anti gravity. Put a quarter in and balls rise up from the bottom as though weightless through wind tunnels until they fall down colored springs or roll down the yellow circular track. While the balls are floating, music catches the attention of all others around. Lights flash to gather even more attention until the show is over. If you look closer you will see the gumball spiraling down its own spring until it rests in the exit chute to be eaten. Walk away from the machine and a couple minutes later a shortened version of the show will entice somebody else to play. **THE AIR SHOW** will tease the quarters from children of any age and earn the owner valuable income.

SPECIFICATIONS:

Dimensions: 21"x21"x76"

Weight: Approx. 150 lbs.

Construction: All steel construction painted with scratch resistant powder paint.
